By Ziva Kunda : Social Cognition: Making Sense of People ib psychology notes on the sociocultural level of analysis sociocultural cognition evaluate social identity theory making reference to relevant studies the social cognition learning model asserts that culture is the prime determinant of individual development Social Cognition: Making Sense of People:

0 of 0 review helpful Great compilation of theory on human behavior to avoid folly By LRRR Great compilation of topics for those of us who are interested in understanding the motivations and biases in decision makingI found the

overall structure a little bit disorganized but each topic is enjoyable easy to understand and thorough I read it from cover to cover but will for sure come back to re read specific top How do we make sense of other people and of ourselves What do we know about the people we encounter in our daily lives and about the situations in which we encounter them and how do we use this knowledge in our attempt to understand predict or recall their behavior Are our social judgments fully determined by our social knowledge or are they also influenced by our feelings and desires Social cognition researchers look at how we make sense of other people From concepts and categories to memory and judgment and self and culture Kunda provides a thoughtful integration of research on mind and social world Her analysis is deep her assessments are judicious and the emerging picture of social cognition is vast
