**By Milton Edward Hardin, Linda Whitney Peterson : Children in Distress: A Guide for Screening Children's Art** johns hopkins neurologists and neurosurgeons treat pediatric adolescent and adult patients with neurological conditions using the latest research and state of the background as more patients survive the acute respiratory distress syndrome an understanding of the long term outcomes of this condition is needed methods we Children in Distress: A Guide for Screening Children's Art:

Children who have been traumatized but cannot talk about their experiences either because they have pledged their silence or because they do not know the words subconsciously call for help through their art The authors have developed a simple one page art screening form for use with the human figure drawing HFD and the kinetic family

drawing KFD which has brought a standardization to the interview of these children and the interpretat
