3 of 4 review helpful The Dynamics of Art As Therapy With Adolescents By Customer Mr Moon has extraordinary

insight into the soul of the adolescent and in addition is able to put that knowledge into the written form. The text reads like prose and is filled with information that is applicable in many settings. This new text is an in depth exploration of the role of art therapy in the treatment of emotionally disturbed adolescents. The book has grown out of the author's twenty four years of clinical art therapy experience, much of which has been devoted to caring for severely hurting young people. There are three primary topics that are explored within the book: fifteen chapters. First there is attention given to understanding the developmental issues facing adolescents.
