From Brand: Jason Aronson, Inc. : Play Therapy Interventions with Children's Problems: Case Studies with DSM-IV-TR Diagnoses feb 10 2017nbsp;dsm 5 uses universal symptoms to define the diagnostic criteria for mood episodes including major depressive and manic episodes at least 1 true manic pain disorder is one of several somatoform disorders described in the revised fourth edition of the mental health professionals handbook the diagnostic Play Therapy Interventions with Children's Problems: Case Studies with DSM-IV-TR Diagnoses:

7 of 9 review helpful Not what I expected By A Buckley I thought this would be a helpful resource for Treatment Planning with children It's more of a brief synopsis of treatments for specific disorders with little instruction on how to replicate treatment methods The cases I've read are 2-3 pages and all have a happy ending which is frankly not realistic There is little focus on the family system as a whole which is good This is an easy to use reference to the most effective play therapy techniques and their substantiated results Play therapy is not an approach based on guess trial and error or whims of the therapist at the moment It is a well thought out philosophically conceived developmentally based and research supported method of helping children cope with and overcome the problems they experience in the process of living their lives Concise digests of play therapy procedure A gold mine of useful information Terry Kottman In this volume play therapy articles and dissertations published over the past fifty years are digested for ease of reference Charles E Schaefer About the Author
