examines different types of grief ranging adolescent volcanoes helping adolescents and their parents to deal with anger warwick pudney and liane whitehouse 4595 Transdiagnostic Treatments for Children and Adolescents: Principles and Practice:

This volume presents cutting edge advances in case conceptualization and intervention for children and adolescents who typically present for mental health treatment with multiple overlapping problems. Leading clinician researchers examine common processes including stress and coping, attention and interpretation, biases, avoidant behaviors, and peer and family interactions that underlie the development and maintenance of diverse forms of psychopathology. Everybody knows that a dimensional transdiagnostic approach to understanding and treating psychopathology is the wave of the future, but there are few guides on how to get there. Ehrenreich, May, and Chu, two of the leading young clinical scientists in this field,
