Psychosocial Treatments for Child and Adolescent Disorders: Empirically Based Strategies for Clinical Practice:

It is estimated that between 17 and 22 per cent of children ages 6 to 8 exhibit some form of behavioural emotional or developmental disorders By and large the children who receive treatment for these disorders receive interventions that do not have empirical supports with regard to efficacy It is estimated that more than 200 treatment modalities are actually practiced with this population and research has examined only a few of these Clearly treatment research for
