**By Robert F. Stadolnik : Drawn to the Flame: Assessment and Treatment of Juvenile Firesetting Behavior (Practitioner's Resource Series)** Drawn to the Flame: Assessment and Treatment of Juvenile Firesetting Behavior

(Practitioner's Resource Series):

4 of 4 review helpful Adequate summary for informal assessment only inadequate treatment section By MVBerry I'll just briefly diverge somewhat from Mr Lassiter above to say that while the bulk of this slim book provides a solid introduction to the issues for informal assessment falling short of sufficient depth for formal assessment the very brief section on treatment is completely inadequate if you are a clinician This work comprehensively cites the relevant research and findings and provides the mental health practitioner with a description of the assessment domains models and tools that currently represent best practice standards in the field of juvenile firesetting behavior In addition it describes the importance of collaboration with fire service professionals and identifies numerous regional state and national resources for those interested in pursuing further study
