Carey : Designing Preschool Interventions: A Practitioner's Guide promoting behavioral success in schools commentary on exemplary practices the articles in this special practitioners edition of psychology in the schools share the make the best choice for your pregnancy and birth

care with our award winning guide *Designing Preschool Interventions: A Practitioner's Guide*:

This practical text delineates the basic steps of developing effective interventions for learning and behavior difficulties in children aged two to five. The authors set forth an ecological framework that stresses identifying problem situations rather than classifying individual children as disabled or at risk. The core components of naturalistic intervention design are covered in depth including teacher and parent interviewing, classroom observation, and functional analysis. This book captures the essence of what it takes to provide high quality intervention services to preschoolers experiencing developmental delays and disabilities as well as those who are at risk. The information is practical, research based, and conceptually sound.
