By Susan J. Bradley MD FRCP : Affect Regulation and the Development of Psychopathology Affect Regulation and the Development of Psychopathology:

This pioneering work sets forth an integrative model for understanding the development of psychopathology. What makes a person vulnerable to mental illness in general. To specific clinical syndromes. Why are some individuals highly prone to emotional distress. Seeking a deeper understanding of these compelling questions, the volume highlights the central role of affect regulation or the failure to develop functional strategies for regulating affect in a wide range.
