**By Jon A. Shaw, Zelde Espinel, James M. Shultz : Care of Children Exposed to the Traumatic Effects of Disaster** sep 22 2016nbsp;posttraumatic stress disorder ptsd in children and adolescents occurs as a result of a childs exposure to one or more traumatic events that were military children are our nations children living in either military or civilian communities in urban suburban or rural settings military children experience Care of Children Exposed to

the Traumatic Effects of Disaster:

The psychological consequences of disasters for children are often slighted in disaster management. Children are uniquely vulnerable as they are still maturing physically, emotionally, cognitively, and socially. Mental health and psychosocial support services are typically overlooked, delayed, and/or haphazard during response and recovery efforts. All too often, children and families usually have limited access to mental health treatment services once the emergency is past. From the Inside Flap: The psychological consequences of disasters for children are often slighted in disaster management. Children are uniquely vulnerable as they are still maturing physically, emotionally, cognitively, and socially. Mental health and psychosocial support services are typically overlooked, delayed, and/or haphazard during response and recovery efforts. All too often, children and families usually have limited access to mental health treatment services once the emergency is past.
