Cultural factors play a very important role in the way psychiatric symptoms are presented to clinicians and how clinicians deal with them. This book offers practical advice for the individual practitioner. The Dept of Health requires all NHS staff to receive cultural competency training. Some chapters were originally published in the Colleges journal *Advances in Psychiatric Treatment* and have been updated; some are newly commissioned. Readership Primar American readers will note that much of the literature reviewed is from the United States and culture related issues in the United Kingdom are more similar than different from those in the United States though undoubtedly some differences exist.
