Did You Hear That Help for Children Who Hear Voices is about five very different children who share one thing in common — hearing voices and seeing things that are not there. Susie is a 9 year old who keeps her challenges with auditory and visual hallucinations a secret until a teacher alerts her parents of her difficulties at school. With compassion, empathy, love and understanding, Susie's parents encourage her to see a counselor. Susie builds trust. A rich resource for counselors and therapists who can read the book with children who might otherwise never learn that other children share their experiences. Impressive in its capacity to speak directly to children in a language they will understand this.
